Digitalization E-Government

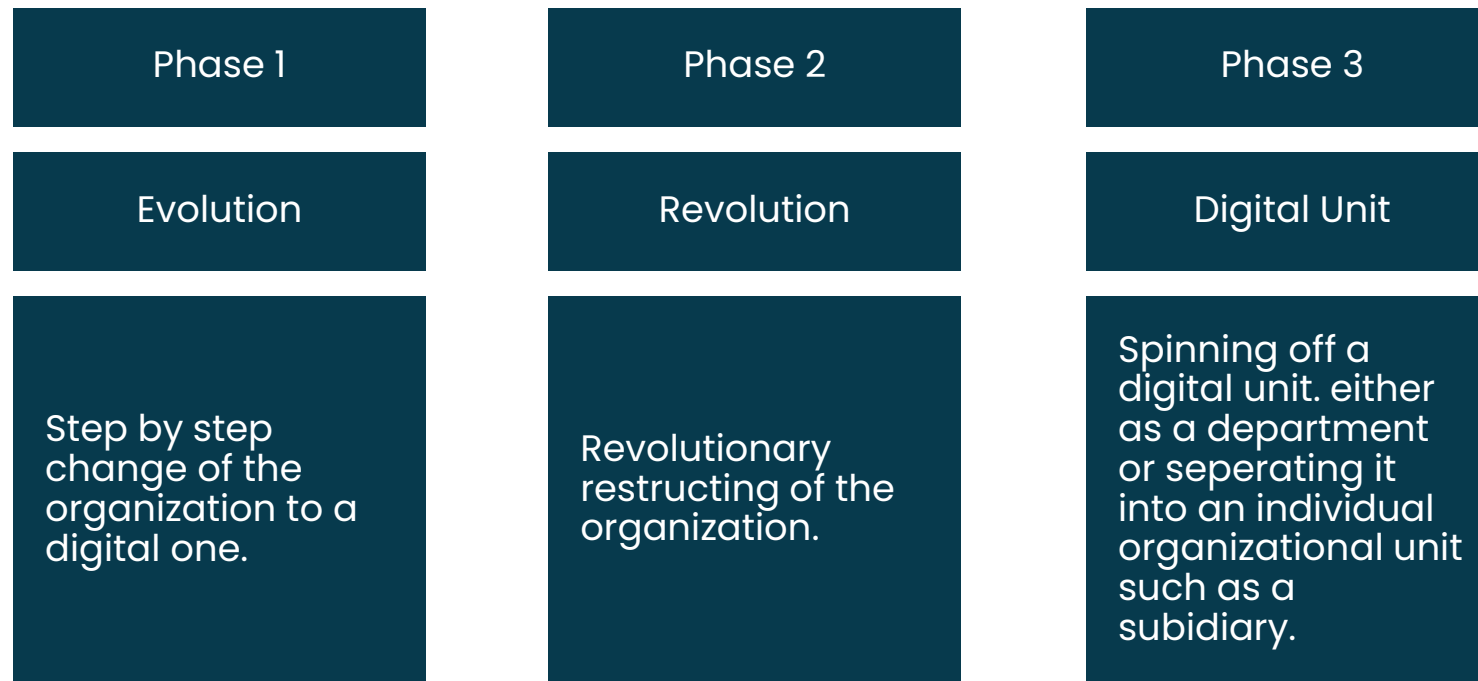

German Group for Services & Consultancy

What We Do

Building Digital Organizations

Digital Transformation

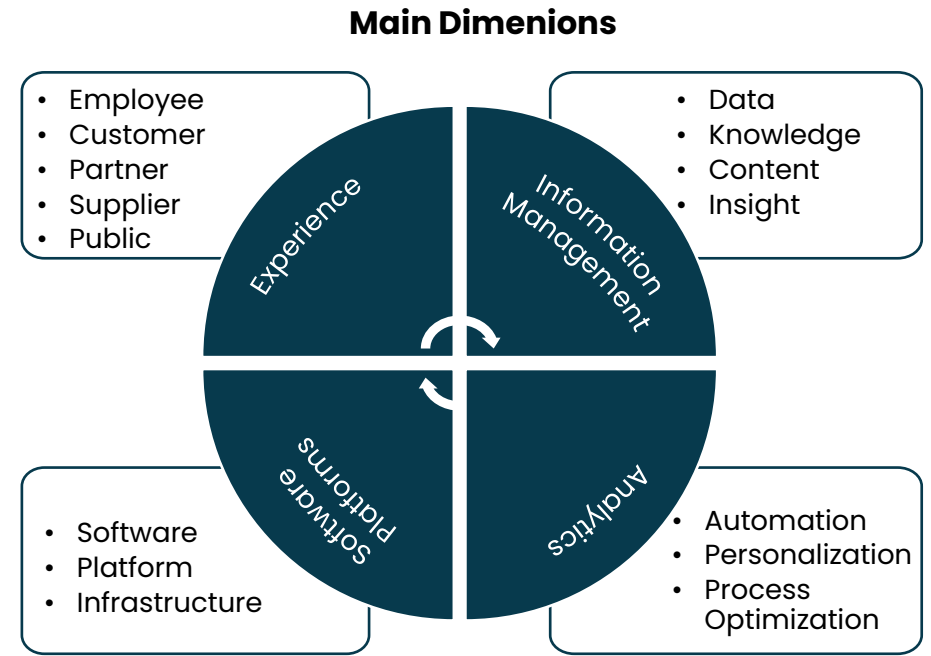

Digital transformation drives change in three areas: customer (citizen) experience, operational processes and business models. The process of digital transformation requires coordination across the entire organization, and involves business culture changes.

What We Do

Digitization Key Elements

- 1 The starting point for digitalization is the development of a digital strategy.
- 2 Transformation of the core business and the development of new digital business segments.
- 3 Digitalization drivers are often the IT departments, but specialist departments and management must also support the digital strategy as well as

Advantages of Digitalization (E-Government)

Digitization provides number of benefit offered all stakeholder of any type of organizations

Management

- Fast reaction for operative and strategic handlings
- Competitiv edge

Enterprise

- High performance
- High quality of software, long term
- Flexibility, Scalability, automation

IT

- Scalable infrastructure
- Shorter release cycles
- Less effort for development

Sales

- Automated sales support
- Partner Portal
- Simpler on boarding

Finance

- Reduced investment costs
- Lower personal costs
- Efficient use of resources

HR

- Target candidate marketing
- Talent Tracebility
- CRM with all data

Marketing

- Personalized adress
- Better targeting
- Shorter time-to-market
- Analysis of results

Citizens

- Faster support times
- Improved support quality
- Central customer data
- Knowledge managemnet

Digitization Methodologies

Team Structure & Methodologies

Agile team structure together with continuous development-deployment is norm for digital organizations

Delivery Structure

Delivery Methodologies

An agile approach to delivery

- People: teammates, customers, and interactions between these people – instead of processes and tools
- Immediacy: Working software – instead of comprehensive documentation
- Flexibility: Responding to, and even embracing, change – instead of following a predetermined plan

Digitalization (E-Government)

Smart Government

The process of digital innovation using open data is embedded deeply across the entire government, with buy in and leadership from the top tier of policymakers. The innovation process is predictable and repeatable, even in the face of disruptions or sudden events that require rapid responses

	eGovernment	Open Government	Data-Centric Government	Fully Transformed Government	Smart Government
Drivers	Compliance, efficiency	Transparency and openness	Citizen value	Insight-driven transformation	Self-defining
Service model	Reactive	Intermediated	Proactive	Embedded	Predictive
Digital System	IT-centric	Citizen-centric	Data-centric	Thing-Centric	Ecosystem centric
Ecosystem and users	Governmentcentric	Service cocreation	Aware	Engaged	Evolving
Technology focus	Service Oriented Architecture	API enabled architecture	Open any data	Things as data	Intelligence
Leadership	Technology	Data	Business	Information	Innovation
Key metrics	% Services online	Number of open datasets	Number of data-driven services	% of new and retired services	Number of new delivery models
